

2LDCHG EPAF Usage

Effective immediately, please do not use the 2LDCHG EPAF to process any transactions that cross fiscal years. We have discovered this causes an encumbrance problem. We are working with SunGard to try to understand why this is occurring. The workaround – entering two 1LDCHG EPAFs, while more work, will avoid this situation. You can still use the 2LDCHG EPAF if all of the job labor distribution records have effective dates within the same fiscal year.
