

ALERT

New EPAF Trappings

Two new trappings have been developed to address the problems we've encountered where EPAFs are initiated that cross fiscal years. Please read more about these [new different year EPAF trappings](#) as we have revised our restrictions on some EPAFs previously identified below.

Processing EPAFs which Cross Fiscal Years

A problem has been found relating to encumbrances generated from EPAFs coded after 6/21/07 that cross fiscal years (FY07 over into FY08). It is very important that you cease using a specific set of EPAFs until further notice. Please read the [email announcement](#) for detailed information about this issue.
