

## Extracting Time for an Employee on PHATIME

A user recently identified a problem extracting time for an employee in PHATIME. We have confirmed the problem and will be contacting SunGard.

Time Entry Selection Criteria PHATIME 7.2 (BTRN)

Begin: 05-MAY-2007 End: 18-MAY-2007 Check: 25-MAY-2007

**Employee**

ID:

Last Name: Wilson

OK Cancel

This problem ONLY occurs when extracting time for an employee using their Last Name on the Time Entry Selection Criteria box. When you answer Yes to the question "Do you want to extract time to begin time entry", ALL employees within the timesheet organization are extracted; not just the employee listed in the Last Name field.

This problem does not occur when extracting time for an employee using their ID: or after locating the employee using the search function associated with the ID: field.
