Home Page Overview

The Home page is composed of tiles, which are containers that display a summary of content from product components. You can click a tile to perform a function such as punching in. You can also navigate to application-specific components, and take actions on your timecards, request time off and other items that you may use regularly.

Home page actions

- Click Restore to restore the Home Page to its original configuration. The Restore button turns orange to indicate that it is active, and changes have occurred. If you click Restore, you will only see Application tiles, not charts.

- Click Settings at the top right of the screen to access the Tile library and add or remove tiles to and from your Home page.
